

# Symon NetLite II Series LED Displays

Symon is the global leader supplying innovative LED displays with a full line of standard and color LEDs supporting the visual communication eco-systems in contact and support centers, manufacturing and logistics, financial services and many other industries.

Symon NetLite II has multiple industry-first features that will change how you use LED displays in the future. It has all the award winning and industry leading features of past generations of Symon LED displays plus a number of unique technology innovations.

You now have the freedom to locate your NetLite II almost anywhere because it's wireless! You can also configure a NetLite II from a browser – another industry first. And, Symon's patented power cabling, yet another industry first, allows you to just plug it into a standard wall outlet thereby eliminating special wiring needs.

## The NetLite II Advantage

- LED displays can be seen from long distances and are very readable
- No line of sight/visibility issues as with newer technologies
- Excellent medium to display KPIs and metrics
- Seamless integration with Symon's visual communications eco-system
